Examples for the marketers ;

Simplified scale for small producers:

Small producers have the option of declaring their marketings according to the classical scale, or according to a simplified one:

- Raking into account the material without specification and the weight of the highest decile,
 - Declaration per 10 products.
 - Application of a higher eco-participation fee than the standard scale.
- This simplified scale is available on the Eco-fee pricing scale and grid, downloadable from the website, as well as on the Code generator.
