and data sheets

PRODUCTS concerned

CATEGORY 1

Toys, as defined in Article 2 of French Decree No. 1010-166 of 22 February 2010 on toy safety:

Outdoor games

Indoor games
(doll, teddy,
construction sets,
action games, etc.)

Board games
(for under 14s)
and puzzles
(less than 500 pieces)

Free toys
(toy distributed
free of charge
to the consumer)

CATEGORY 2

Models

Puzzles
(over 500 pieces)

Board games
(for over 14s)

SPECIFIC PROVISIONS FOR PAPER/ PACKAGING EPR

Board game boxes are game items and are therefore covered by toy sector ERP.

For more information, see [guidance document No.12 to Directive 2009/48/EC](#).

The following are excluded from the regulatory scope:

- > Toys classified as electrical and electronic equipment (WEEE EPR).
- > Writing and drawing implements.
- > Pet toys.
- > Sports and leisure equipment covered by EPR for sports and leisure equipment.
- > Children's furniture and textile decoration covered by EPR for furnishings.

WHAT HAPPENS TO my eco-fee?

WHAT HAPPENS TO my eco-fee?

The eco-fee allows Ecomaison to organise and **fund the collection** of building and housing products and materials, as well as **the repair, reuse and recycling** of sorted products.

Source: key figures 2024

PRICING IS CALCULATED BASED ON 3 CRITERIA:

› Product features

The rate depends on the product type, weight, materials used and the product's recyclability or recycling disruptors.

› Management costs

The rate reflects the real costs of the sector, including product collection, sorting, transportation and processing. The smaller the object, the more logistics required to collect it, resulting in higher costs.

› Eco-modulations

Bonuses and penalties may apply depending on eco-design criteria (extension of useful life, incorporation of recycled materials, recycling disruptors, etc.).

CALCULATING my eco-fee and IMPROVING my environmental performance

All the info on eco-modulations

Rewarding my commitment

what are eco-MODULATIONS?

- › Eco-modulations are a scheme provided by Ecomaison to **reward the circular efforts** of our most virtuous members.
- › By sourcing raw materials from renewable or recycled resources, extending product useful life and implementing a circular purchasing policy, you can **improve your eco-fee and/or benefit from bonuses**.
- › By adopting these practices, you can optimise your obligations, **make your business more circular and drive your industry's performance**.

My Ecomaison invoice

	Total
Eco-fee for initial market launch on French territory (new or second-hand) I owe Ecomaison	€A
Reduction of eco-fee due to eco-modulations	€B
My total eco-fee	A-B = €C
Bonuses for incorporating recycled materials Ecomaison owes me	€D
MY TOTAL CONTRIBUTION PAID	C-D = €E

How can I improve my contribution?

Sustainable management

Recyclability

Extension of useful life
Provision of spare parts

Incorporation of recycled materials (IRM)

SUSTAINABLE resource management

The sustainable product management criterion relates to the material of which the product is made.

Sustainable management means that:

- › the product meets a minimum threshold concerning the amount of its materials sourced from **sustainably managed resources**;
- › the products or their constituent materials are **certified** or carry a corresponding label.

*NB: the sustainable management bonus is subject to the absence of recycling disruptors.

Eligible materials:

Wood

Bio-based materials
(paper, cardboard)

WE PROVIDE TOOLS:

To view the list of recycling disruptors, see the [dedicated page](#) (in French only).

WE PROVIDE SUPPORT:

The item code incorporates eco-modulation for sustainable management.
It's easy!

Levels of recyclability

Your product's recyclability depends on its constituent materials.

To benefit from this eco-modulation, you must take into account the materials used during the manufacture of the product.

A product composed mainly of materials, wood, metal or mono-resin plastics will entitle you to a **lower eco-fee, as it is more easily recyclable** than a product made from a combination of materials or multiple resins.

*NB: the recyclability bonus is subject to the absence of non-sustainable materials and recycling disruptors.

4 Ecomaison recyclability levels

WE PROVIDE SUPPORT:

The item code incorporates the eco-modulation for recyclability
It's easy!

TO FIND OUT

the recyclability of the products you launch onto the market, head to the corresponding [data sheets](#).

RECYCLABILITY LEVELS for Toys

- **Metal** > 95%
- **Wood, paperboard through certified sustainable management, PP, PE & mixed PP-PE** > 95%
- **Metal** > 50%
- **Paperboard, wood, PP, PE, mixed PP-PE** > 50%
- **Other plastics** > 50%
- **Other materials** > 50%
- **No main material**

PROVISION of spare parts

This eco-modulation rewards the **provision of spare parts by the marketer** (manufacturer or distributor) to the consumer on request:

- › inherent to the main function of the product (excluding accessories);
- › available even after the final marketing of the product (for a duration of 2 years for toys).

*NB: the recyclability bonus is subject to the absence of recycling disruptors.

WE PROVIDE SUPPORT:

The declaration code includes the eco-modulation for extending the useful life.

It's easy!

Eco-modulated codes for spare parts end with the number 1.

INCORPORATION of recycled materials (IRM)

Ecomaison rewards you for **incorporating recycled raw materials** into a product launched on the market⁽¹⁾.

This reward is calculated based on the amount of recycled materials incorporated into your product.

This concerns products containing the following materials⁽²⁾:

Plastics

(1) A breakdown by material can be found in the [data sheets](#).

(2) The technical details of the materials concerned, recycling disruptors, minimum incorporation thresholds and the [list of hazardous or REACH-classified substances](#) can be found in the fact sheets included in the appendices.

*NB: the minimum thresholds of post-consumer recycled materials incorporated (by materials or products) are indicated in the [data sheets](#) appended to the price guide.

These materials are eligible if they:

- **are exclusively sourced from end-of-life products** (post-consumer waste), from a holder listed with an approved eco-organisation in France;
- **do not contain** any substances that are hazardous or listed under REACH;
- reach a **set minimum threshold** (in %) of the product's material composition;
- fulfil the principle of proximity, meaning that the stages of collection, sorting, recycling and incorporation of **recycled materials are all carried out:**
 - within a 1,500 km radius of France's barycentre;
 - in an EU Member State.

These plastic products are not eligible if they:

- incorporate recycled plastic in a composite matrix, i.e. plastic resins associated with reinforcements forming a composite material with strengthened physical and mechanical properties;
- contain recycling disruptors identified by approved eco-organisations for the corresponding product category (2);
- contain less than 50% post-consumer recycled plastic incorporated into the finished product.

CODIFYING **my products**

CODIFYING my products

ONE PRODUCT = ONE 11-DIGIT ITEM CODE

The item code allows you to apply the corresponding eco-fee pricing scales and to declare the launch of products subject to regulation.

CONSULT OUR PRICING SCALES:

Item code and eco-fee generators are at your disposal.

> [Pricing scales applicable as of 01/01/2026](#)

DECLARING my contribution

Your eco-fee must be declared to Ecomaison on a quarterly basis.

Ecomaison offers two types of declarations for companies whose market launches cover **fewer than 15,000 items per year⁽¹⁾**:

Declaration for codification

The amount of your eco-fee is **based on product codes**.

All of your products with eco-modulated item codes are therefore listed.

Your eco-design efforts are taken into account and highlighted.

Flat-rate declaration

You apply an annual fee of €22 per 100 items⁽²⁾ using the appropriate code: 31208120910.

Your administrative procedures are less complicated, but your eco-design efforts are not taken into account.

(1) Subject to a maximum unit weight of 10 kg and a total weight of less than 15 tonnes.

(2) This fee applies without declaration of the category, weight or material of these products.

KNOWING the rates for 2026

RATES excl. Taxes in pictures

1 Teddy bear - 0.3 kg - €0.08

2 Board games - 1.5 kg - €0.22

3 Wooden game - 10 kg - €1.20

4 Baby walker - plastic - 5 kg - €1.14

Rates excl. tax by weight bracket

RATES excl. Taxes in pictures

1 Slide - 20 to 23 kg - €2.80

2 Trampoline - 30 to 38 kg - €3.68

3 Swing - 50 to 90 kg - €6.60

4 Bowling set - 4 kg - €0.39

SPECIAL RATES

Outdoor toys ≥ 20 kg – 160 cm

Special rates can be applied for products meeting the following criteria:

- Outdoor toys
- Category: Family toys
- Combination of up to 3 materials
- Weight greater than or equal to 20 kg and size 160 cm or above (L+W)

This special rate is justified in view of the characteristics of these toys, which are automatically disassembled and placed in large-volume containers (e.g. skips).

BRACKETS CONCERNED	COMBINED RATE: COMBINATION OF 3 MATERIALS (€ EXCL. TAX)
20-25 kg	€2.80
25-30 kg	€3.17
30-40 kg	€3.68
40-50 kg	€4.33
50-100 kg	€6.60
100-150 kg	€8.86
150-200 kg	€12.40
200-250 kg	€15.94
≥ 250 kg	€17.72

€7 per pack of 1,000

Free toys

Free toys (gifted free of charge) have special codes and an associated rate of €7 per pack of 1,000.

- Category: Free toys
- Product type: Free toys & accessories
- Type of material: up to you
- Characteristic: Pack of 1,000

In practice, codification will take the following form:
34220XX0890

APPENDICES and data sheets

Recycling disruptors

Sustainable management
criteria

Overview of supporting
documents

RECYCLING disruptors

These are elements or materials that prevent recycling.
There are 2 categories:

Chemical disruptors

Hazardous substances within the meaning of the AGEC Act (Art. 13), i.e.:

- Substances of “**very high concern**” within the meaning of the European REACH regulation, in a concentration above 0.1% weight by weight.
- Substances listed under Annex XVII to REACH in **quantities exceeding the established limit**.
- **Substances** subject to **the POPs regulation** (Appendix 4).

[READ MORE](#)

Physical disruptors

- Materials or assembly methods that **do not allow the extraction of materials** or that **compromise the quality of the flow to be recycled**.

WE PROVIDE TOOLS:

Discover the list of disruptors to assess the recyclability of your products using the Ecomaison tool.

STATEMENT OF PRESENCE of hazardous substances

The obligation to display information on the presence of a hazardous substance applies when it is present in concentrations above 0.1% weight by weight in a substance, mixture or item, within the meaning of points 1, 2 and 3 of Article 3 of Regulation (EC) No. 1907/2006 known as REACH, as supplemented and updated by order of the Minister for the Environment.

Information on hazardous substances
can be displayed via:

- The product sheet.
- The [Scan4Chem](#) application.
This app is financed by the European Commission as part of the LIFE programme, in which France is actively involved through the French National Institute for Industrial Environment and Risks (INERIS).

The statement to be
displayed is as follows:

CONTAINS A HAZARDOUS SUBSTANCE

OR

**CONTAINS A SUBSTANCE
OF VERY HIGH CONCERN**

The statement is supplemented by the name
of each hazardous substance present.

Renewable Resources sustainable management criterion

SUSTAINABLE MANAGEMENT - WOOD (WOOD-BASED PANELS (PP, OSB) OR PAPERBOARD)

The “**Sustainable Management - Wood**” rate is applicable in accordance with the following conditions:

Sustainable management - wood or paperboard products

Minimum “Sustainable Management” wood content in the product:

Toys: **50%**

Material

“Sustainable management” wood, i.e. derived from sustainably managed resources and certified:

- PEFC, PEFC recycled, FSC Mix, FSC recycled;
- or under any equivalent due diligence system

Labels & Certification

or equivalent

These labels and certifications are accepted to indicate the resource's sustainable management.

OVERVIEW OF SUPPORTING DOCUMENTS for eco-modulations

	 ECO-MODULATION • Recyclability • Sustainable renewable resource management • Extension of useful life
APPLICATION RULES	Upon declaration→ Rates via the different codes
SUPPORTING DOCUMENTS	- Sustainable renewable resource management - Sworn statement to be completed in the “Services” space - Supporting documents to keep available in the event of an inspection (by way of example, non-exhaustive list): transaction documents: purchase invoices and/or delivery notes, recognised certificates and/or transaction certificates, detailed product data sheets (including composition details)
	- Recyclability - Use of the “Recyclability” tool - Supporting documents
	- Extension of useful life - Schedule of declaration to be completed in the “Services” space and - Supporting documents to be uploaded to the “Services” space

eco-MODULATION supporting documents

SUSTAINABLE RENEWABLE RESOURCE MANAGEMENT

Supporting documents will vary depending on the material. You must then **complete a sworn statement in the Ecomaison “Services” space** concerning the possession of the supporting documents listed below.

Wood

- **Product labels and certifications**, according to the principles of the control chain for the labels and certifications concerned: PEFC, PEFC Recycled, FSC Mix or FSC Recycled.
- Or **any equivalent due diligence system** ensuring that the products come from sustainably managed forests and recycled and/or controlled sources.

eco-MODULATION supporting documents

RECYCLABILITY

Documents do not need to be uploaded to the Ecomaison “Services” space.

The supporting documents are available in the event of an inspection by Ecomaison:

› **Product sheets** stating the full composition of the product with the amounts of any hazardous materials and substances.

› **Results available in the [Ecomaison tool](#)** for recyclability analysis.

4 recyclability levels

OVERVIEW OF SUPPORTING DOCUMENTS for eco-modulations

APPLICATION RULES	Upon declaration → Rates via the different codes
SUPPORTING DOCUMENTS	Sustainable renewable resource management Sworn statement to be completed in the “Services” space Supporting documents to keep available in the event of an inspection (by way of example, non-exhaustive list): transaction documents: purchase invoices and/or delivery notes, recognised certificates and/or transaction certificates, detailed product data sheets (including composition details)
	Recyclability Use of the “Recyclability” tool Supporting documents
	Extension of useful life Schedule of declaration to be completed in the “Services” spaces and Supporting documents to be uploaded to the “Services” space

eco-MODULATION supporting documents

EXTENSION OF USEFUL LIFE

	Provision of spare parts
DECLARATION APPENDIX: Available in the "Services" space Information to be filled out	• Product references and Ecomaison codes • Provision date • Date of end of commercialisation (presumed, by default, to be 31 December N+2 for toys)
SUPPORTING DOCUMENTS: To be uploaded to the "Services" space	• Supporting document providing proof of spare part availability, such as: BOM – Bill of Materials/parts list and/or exploded-view drawing and/or instruction manual

OVERVIEW OF SUPPORTING DOCUMENTS FOR the IRM bonus

	 BONUS • IRM
APPLICATION RULES	Upon declaration → Specific calculation and payment of a certain amount
SUPPORTING DOCUMENTS	Documents to be forwarded → For manufacturers: - specific certification of the recycled materials supplier (see Ecomaison list) - or certificate from the recycled material supplier - failing this, a certification obtained from a COFRAC-accredited certifying body → For distributors and importers: - specific certification of the manufacturers supplying the products (see Ecomaison list) - failing this, a certification obtained from a COFRAC-accredited certifying body The certifications or attestations must specify: - the origin of the eligible recycled material incorporated into the material or product - the content of this recycled material in the material (available for example: - for wood, in the FSC Recycled or FSC Mix certificates or any equivalent system; - for plastic, in the provisions of the NF EN 15343 standard).

*NB: at the date of publication of this guide, the work on the material control and traceability chain carried out at the level of the OCABJ (coordinating body of the furnishings, DIY and garden waste sector) was still underway.
