

An isometric illustration of a city scene featuring various buildings, trees, and people. In the top left, there's a residential building with a balcony and a small garden. Next to it is a modern office building with a sign that says "ecomaison". To the right, there's a large warehouse or factory with a sign that says "TOUT BRICO". In the center, there's a flower shop with a sign that says "FLORILAND". To the right of the flower shop, there's a construction site with a crane and a sign that says "CHANTIER". In the bottom left, there's a building with a sign that says "RESSOURCERY". The scene is filled with trees, people walking, and various vehicles like trucks and cars.

2025 RESULTS

ecomaison

Ecomaison is a state-approved Producer Responsibility Organisation in charge of sorting, collecting, reusing, and recycling household items and materials from homes and living spaces, including furniture, bedding, decorative textiles, construction products and materials, DIY tools and gardening supplies, and toys.

Every day, Ecomaison connects the stakeholders who drive the circular economy: manufacturers, distributors, local governments, operators, repairers and social solidarity stakeholders.

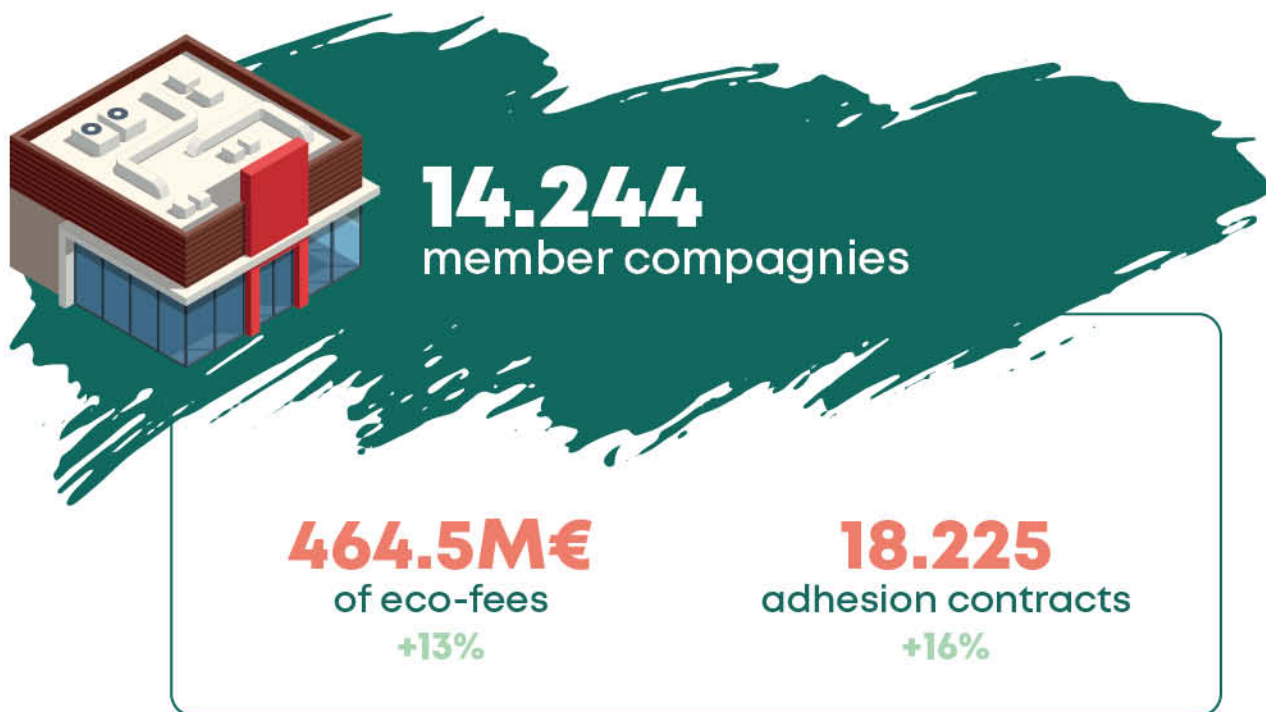

Together, they repair, collect, reuse, sort and recycle.
And they invent the solutions of tomorrow.

The 2025 results tell the story of a collective effort.

They prove that connecting the right stakeholders with the right solutions makes all the difference when it comes to advancing the circular economy.
